

MOLDED DIMENSIONS INC.

Custom Molder of Rubber and Cast Polyurethane Components.

Molded Dimensions, Inc., Named TOP WORKPLACES

Port Washington, WI, April 24, 2016 – Molded Dimensions, Inc., is pleased to announce that it has been selected as one of the Top Workplaces in southeast Wisconsin for the fifth year in a row.

Several months ago, MDI employees were surveyed. It is from the workplace survey responses that MDI was chosen as a Top Workplaces company. The MDI responses are compared to local and national averages in the areas of execution, work environment, connection, company direction, supervisions, and pay/benefits. MDI continues to beat the industry averages by as much as 40% on these criteria.

2,200 employers were nominated, with 150 being selected as a Top Workplace. In this process, over 110,000 people in Southeast Wisconsin were surveyed. As part

of the small business category of 149 or fewer employees, MDI was selected as a Top Workplace.

The guiding principle is to "Create a Place where Great People Choose to Work". Linda Katz, CEO of Molded Dimensions, stated, "Should we buy this machine? Take this job? Hire this person? Upgrade the lunchroom? If it helps **create a place where great people choose to work**, we will make it happen. We pay for college, provide Molded Dimensions' clothing, subsidize local organic produce, tell the truth, share all financial information, and party together at Brewers games, Lambeau Field, cabaret shows, and riverboat cruises. But the real magic happens every day at Molded Dimensions, when exceptional people - smart, funny, hard-working, dedicated people - all row in the same direction, tackle challenges, delight customers, and feel the joy of being successful together. We are very proud of our work force and proud to earn this special award."

About Molded Dimensions, Inc.

Molded Dimensions, Inc., is a certified woman-owned business and also an employee-owned company. The ISO9001, Wisconsin-based company consists of four business units: rubber, cast urethane, GlocalSource and KM Tooling. The rubber and cast urethane manufacturing facilities are located on the same property in Port Washington, WI. The GlocalSource warehouse and KM Tooling are located in nearby Grafton, WI.

With 65+ years of experience in the manufacture of precision molded rubber and cast polyurethane mechanical components, the heavily engineering-oriented team consists of an on-site Chemist, Project Engineers, and Technical Sales. A portion of the company, call GlocalSource, provides product from worldwide manufacturers supported by MDI's technical service and support. KM Tooling is a leader in precision mold design and manufacture, trim die fabrication, and custom precision machining.

Molded Dimensions, Inc., capabilities include:

- Rubber and cast polyurethane molding
- Customer material formulation
- Insert bonding
- Tool design and construction
- Die cutting

- Machine finishing
- Cryogenic deflashing
- Special packaging
- Inventory programs

Their molded products are used in a wide variety of industries including heavy machines, small engine, marine, waste management, automotive, medical, food processing, high speed packaging, constructions, and mining.
